

Cleaning guidelines for Franke Evolution

Cleaning the milk frother

To remove coffee outlet press down with your thumb on the marked area and pull outlet towards you.

To remove the milk frother gently slide milk frother from machine by pulling it towards you. Remove black twist part and small white part, wash under cool water ensuring all milk is removed. Clean all outlets with brushes and wash with cool water. Replace all parts correctly, slide milk frother and cover back onto the machine.

Daily Cleaning procedure

1. Fill 2 containers with 1 litre of cold water, add 30mls of milk cleaning solution to one of the containers.
2. Press and hold the clean button on top left corner of the machine. Display will read empty drawer, open door promptly and empty dregs drawer, clean under and around the drawer and clean the piston head with long piston head brush.(drawer needs to be open for minimum of 30 seconds to register cleaning required)
3. Place dregs drawer back inside and close the door.
4. Machine will then prompt to insert cleaning tablet, take one tablet insert into chute at top of machine and press clean again.
5. Place the milk tube into container containing milk cleaning solution.
6. Press clean again.
7. While the machine is cleaning through the cleaning cycle clean inside the fridge and clean the seals on the door. Empty any milk in the milk container and clean with hot soapy water and rinse well with clean cold water.
8. The display will then prompt to rinse, place the milk tube in container with cold fresh water and press clean again and machine will run through the rinse cycle.
9. Machine will display select product when cleaning cycle is finished.
10. Wash the drip tray and pour hot water down the drain.
11. Make a single product using coffee and milk and discard.

Cleaning the bean hopper

Turn off machine and wipe inside of bean hopper with a clean dry cloth or paper towel. Fill with fresh beans.

Cleaning the piston head

Open the right hand door and remove the dregs drawer. Using the piston head brush or a dry cloth wipe away all coffee granules that have gathered on the piston head.

Cleaning the Fridge unit

Remove the milk container and clean. Using a damp cloth wipe the interior of the Fridge unit paying particular attention to the door seals, ensure all milk deposits are cleaned away.
