

# Cleaning guidelines for ICBA & Thermo coffee brewer

## **Cleaning the brewing unit**

This should be cleaned daily with degreaser and blue paper tissue. Spray a small amount of stainless steel shine on to blue paper tissue and polish the stainless steel on machine.

## **Cleaning procedure for the coffee shuttles**

This should be done daily:

1. Fill the shuttles with hot water and a very small amount of washing up liquid.
2. Leave to soak for ten minutes.
3. Use the long brush to clean inside the shuttles.
4. Rinse twice with cold water to ensure of detergent is removed.

## **Cleaning the spray head**

This should be done after each brew:

1. Wipe the spray head and surrounding area with a clean damp cloth to remove any coffee oil residue after each brew cycle.

## **Cleaning the brew basket**

This should be done after each brew:

1. Remove filter paper with spent grounds.
2. Rinse inside of the brew basket under running water to ensure all coffee grounds are removed.

## **Cleaning the internal coffee level indicator sensor - ICBA brewer only**

This should be done daily:

1. Remove the sensor and wash in hot soapy water ensuring the digital display unit does not get immersed in water.
2. Rinse well with cold water and dry with paper towel.

**N.B never hang label for coffee on the digital display on ICBA Brewer as it will short circuit the display**
